2. Sky images made with Stellarium

All constellation charts, star-hop maps, all-sky charts, quiz and final-assessment sky images are screenshots from **Stellarium** (version 26.3, `https://stellarium.org`, GNU GPL), made by `Resources/_build_scripts/build_stellarium_images.py`.

Sky culture / artwork	Authors	Licence
Modern constellation illustrations	Johan Meuris / Stellarium team	Free Art License
Indian nakshatras	Susanne M. Hoffmann (with B. S. Shylaja)	CC BY 4.0
Babylonian MUL.APIN	S. M. Hoffmann; paintings by Jessica Gullberg	CC BY-ND 4.0
Arabic al-Sufi	compiled by Khalid Al-Ajaji	CC BY-ND 4.0
Greek Almagest	Stellarium sky-culture contributors	CC BY-ND 4.0
Chinese	Stellarium sky-culture contributors	CC BY-SA 4.0

Images showing CC BY-ND artwork (the Almagest, al-Sufi and MUL.APIN views) are reproduced as unmodified screenshots; their titles appear only in the document captions. Titles, compasses and letters were added only to images using Modern (Free Art License) or line-only views.

3. Diagrams

All other diagrams (seasons, Moon phases and tithis, eclipse geometry, Rahu–Ketu, the weekday heptagram, Ramadan drift, IST map, celestial sphere, coordinate systems, circumpolar stars, magnitude scale, telescope optics, equatorial mount, limiting magnitude, exit pupil) were drawn for this course with Python/Matplotlib from computed data (Astropy ephemerides) and may be freely reused with the course.
